

- The shooter did not have the gun with him when he jumped off the roof, disassembled it, then reassembled it just to put it into the gun cardboard box.
- When he was walking to the roof top, the gun was in his pants/shirt, he walks with one leg mostly stiff, but he sometimes bends the knee and there is nothing sticking out like there should.
- There was also 2 different rifles found, a air rifle with a wooden looking stock, and then the one found in the box with a plastic stock
- All of the photos of the shooter dont match up, especially the fbi's enhanced photo.
- the old guy who caused a distraction right after the shooting saying "shoot me, shoot me!!", is a Jewish man named George zinn who was in one of the 9/11 documentaries (also on the ground when it happened) claiming it was al qaeda
- another man was video'd standing up and cheering after the shot went off, when everyone ducked
- his security to his left and right were doing hand signals RIGHT BEFORE the shot went off
- his security was tampering with evidence right after the shot
- there was a drone flying over right as the shot went off, and no one has gotten video from it or found who owns it
- his "switch ring", whatever that is, some how, within one frame of the video, goes from his ring finger to his pinky finger, its a golden ring
- after being shot, he was rushed off by the feds, and no autopsy has been done.
